CIO 20 MOST PROMISING
Review SUPPLY CHAIN
SOLUTION PROVIDERS - 2019

Entercoms recognized by CIO Review in the “20 Most Promising Supply Chain Tech Solution Providers - 2019” list!

Leading provider of solutions for aftermarket and post-sales service supply chains recognized by top technology magazine

Entercoms, Inc., a leading provider of solutions for aftermarket and post-sales service supply chains, was named to CIO Review’s 2019 list: “20 Most Promising Supply Chain Tech Solution Providers - 2019.”

CIO Review is a leading technology magazine that is at the forefront of guiding enterprises through the continuously varying business environment with information about the latest in solutions and services. The magazine was founded in 1987 and works to bridge the gap between enterprise IT vendors and buyers. CIO Review researched and shortlisted Entercoms to 2019’s 20 Most Promising Supply Chain Tech Solution Providers while recognizing it as “digitally transforming service supply chains through a BPaaS Model.”

Founded in 2008, Texas-based Entercoms helps its customers accelerate the transformation of their service supply chains through deep domain expertise and technology. Entercoms achieves this through a BPaaS (Business-Process-as-a-Service) engagement model that focuses on business outcomes at speed. Within 90 days of their engagement, Entercoms’ clients see benefits in areas such as on-time delivery performance, asset uptime, spares inventory, forecast accuracy, field service technician utilization, remote diagnostics accuracy and service revenue.

Entercoms’ focus is on bringing leading-edge solutions to market that are built by industry experts for industry practitioners. In the AI-first world of tomorrow, Entercoms’ BPaaS delivery model ensures technology and domain expertise form a positive feedback loop, each learning from the other, delivering value to their end customers. With its newly patented technology entitled “Part Chain Management in an Aftermarket Services Industry,” Entercoms is able to provide key data modeling capabilities that will be needed for companies to increase customer satisfaction while reducing their total cost of service.

“We are honored to be recognized by CIO Review,” said Dr. Rahul Singh, CEO and co-founder of Entercoms. “This award is a testament to our continuous efforts and growth as a company. We are committed to empowering our customers to have access to the exact parts that are needed, when they are needed.”

Entercoms was selected as one of Gartner’s Cool Vendors in Supply Chain Services in 2016, a 2012 winner of the Ernst & Young’s Entrepreneur of the Year Award and Winner’s Circle membership in the HfS Blueprint Report.

Based in Irving, TX, Entercoms serves customers in industries such as Technology, Industrial, Oil & Gas, Mobility, Point-of-Sale and Manufacturing, Entercoms provides solutions such as Process Control Towers and Customer 360 for visibility and action ready insights, and modular applications for process automation, execution and planning.
